Welcome to the Most Awesome Word List You Have Ever Seen! These words will form the foundation of your next new language. They're some of the most frequent words you'll encounter in any language, and they're all relatively easy to learn using pictures. In addition, because these words are grouped together into stories, they will be much easier to memorize when compared with the typical word lists that you find in language textbooks and classrooms, where you learn colors one day, types of vegetables the next day, members of the family the following day, etc.

What's the story behind these lists?

The research on this topic revolves around the concept of interference.¹ Here's the idea: Suppose you're living in Paris, taking a beginning French class. One day, you learn a bunch of fruit names: une pomme (apple), une poire (pear), une pêche (peach). A few days later, you see an apple at a fruit stand and try to recall the word in French. Your brain jumps into action, looking for your word through several possible routes. It's a fruit! It's a French word I learned a few days ago! It starts with a P!

And because you happened to learn three French fruits that start with the letter P (and all on the same day), you're kind of screwed. Memories compete. When you try to recall your word, your three French fruits get into a kind of mental tug-of-war, while you try to figure out which one

Your first 625 words

seems the most apple-like. As a result, you'll have a harder time remembering pomme, and even if you do remember, you'll take much longer to find it.

And unfortunately, that's not even the end of the story. While you're having this mental fight, you've probably just made the situation a little worse for next time. Every time you think of two things at once, they interconnect. So if you're busy thinking about pommes, poires and pêches, and you're not particularly sure which one's which, then you're jumbling those three fruits together into a messy jam of "Fairly confusing French fruits that start with the letter P." You'll be more likely to remember all three fruits the next time you try to retrieve the word for pear or peach.

I've run into this problem quite a bit on my own, especially in French, where I learned a lot of similar words at the same time. I still have problems remembering whether sept is 6 or 7, or whether jaune is yellow or green.

Looking at the numbers

The concept of interference has been researched in a lot of different contexts, and I've linked five related studies at the end of this article, if you'd like to read more.

One of the first studies (Waring, 1997) gave test subjects a group of three to six words and their "translations" into a fake foreign language (apple = tisahl, pear = nugaw), and recorded how

¹ For more on interference, check out this Wikipedia article: [En.wikipedia.org/wiki/Interference_theory](https://en.wikipedia.org/wiki/Interference_theory)

long it took each subject to memorize the translations. Half of the subjects got a group of closely related words (jacket, shirt, sweater), and half got unrelated words (frog, car, rain). The researchers would quiz subjects (what's the word for "jacket"?) until they could remember every new translation within three seconds ('jacket' is...ummm...iddek!), and recorded the number of times they needed to repeat the tests until a subject successfully memorized a word. These are their results:

Similar words took more than 35% longer to learn, at 11.3 repetitions for a group of similar words, compared to 7.2 repetitions for a group of unrelated words. This isn't particularly efficient.

Still, time isn't everything. What about retention? Once you memorize a group of similar or unrelated words, how well do they stick?

In a 2008 study, researchers tested these ideas in a school, teaching Turkish kids 40 unrelated English words (peg, key, rat, sun) and 40 related words (20 foods and 20 animals) in a classroom setting, and testing them afterwards on how well they could match English words and pictures. They tested them immediately after each lesson

and again one week later. In both cases, the kids had a harder time remembering similar words:

And they took longer to finish every similar-word quiz, taking an average of 5.8 minutes to finish, compared to 4.9 minutes for unrelated-word quizzes.

So What Are Our Options, Then?

When you go by the numbers, learning similar words at the same time is a terrible idea. Granted, it feels a lot more comfortable; you can feel like you've accomplished something whenever you learn new words (I learned all the colors today!), but given the detrimental effects it has on learning, we need some other options. So what are our alternatives?

In most studies, the alternative to word groups involved learning a jumble of totally unrelated words, and that works quite well. If you've browsed through my website or Appendix 5 of my book, you've probably run across my list of 625 words to learn in every language.

The first version of that list was presented in typical groups (animals, professions, etc.), but based upon the research, I started playing around with the idea of an alphabetical list. Normally, an alphabetical list would solve the similar word problem at the expense of adding a new problem: the words would all sound similar. But if you start with an alphabetical list in English and then translate it into your target language, you basically create a randomly ordered list anyway. So I put my English word list in alphabetical order, translated it into Hungarian, and learned that list. In practice, I found that memorizing words was much easier. I stopped getting my greens confused with my yellows (although I still get six confused with seven; I didn't follow my own advice when it came to numbers, and Hungarian's six and seven – hat and hét – are extremely similar looking).

Alphabetical lists are also a lot easier to use; I could just skim through a Lonely Planet Phrasebook, circle my A-words, then circle my B-words, and after 30 minutes, I had good translations for every word in my list. As such, I decided to supply an alphabetical list in my book and added an alphabetical list to my website.

But alphabetical and random orders aren't an especially satisfying way to learn ("I learned 10 random words today" is not as rewarding as "I learned all the fruits today!"), and fortunately, they're not our only options. In one of the earliest studies, researchers tried out groups of words that shared the same theme. These are words that tell a story – sweater, wool, navy blue, striped, changing

room, try on, cash register – rather than words that fit in the same category, like sweater, shirt, jacket, and coat. They're related words, rather than similar words, and there's a huge difference between them.

Learning related words – words that form stories – worked even better than totally random words. Subjects needed approximately 10% fewer repetitions to learn a group of words like "frog, hop, slimy, pond, croak, and green," when compared with "cloud, erase, social, office, lose, and risky":

Why? When you learn related words, they form close associations with each other – frog connects with green and pond. These associations will help you remember the cluster of words later.

This happened with your three French fruits – pomme, poire and pêche – too, but in that case, the words were so similar that they interfered with each other; you couldn't remember which was which.

In our frog story, however, the words are all different enough that you won't have trouble confusing them, and so the net result is a set of words that's easier to remember. These sets of words can also provide you with the sense of accomplishment that's missing from random or alphabetical lists ("I learned the slimy-green-frog story today!"). This makes the learning process more fun, which makes you more likely to stick with it.

What's this list and how do I use it?

This is the exact same list of 625 words that I provide in Appendix 5 of the book and on my website. The primary difference is that I've grouped those words into 89 little stories that will help build associations between those words and make them faster to memorize, easier to retain long term, and more fun to study. I've also commissioned illustrations of each of those stories to further reinforce the associations between the words (and to make the word lists much more pleasant to use).

To save you some time, I've also commissioned professional translators to go through the 625 word lists and give you good, common translations for each word, accurate phonetic transcriptions, gender and/or counter words (when appropriate to the language) and added commentary when there are a few different translations that could be used for a given English word.

Use this list in the exact same way you'd use a random or alphabetical list, as I describe on my

website and in Chapter 4 of the book.² Learn each of your words individually, on its own terms. Play Spot-the-Differences with Google Images and discover what makes French grenouilles different from English frogs. Find personal connections for vert (green) and use mnemonics to remember the genders of your étangs (ponds). This process will build up memorable associations within each word, and make those words much easier to recall long term. By virtue of the fact that you're learning words like woman at the same time as you're learning to wear and skirt, you'll find that those words stick even better, because they'll naturally form associations with each other. Those associations will be further reinforced by the illustrations on top of each page.³ All in all, this word list will help you learn your first 625 words faster, and make that process substantially more fun. Enjoy!

The 625: In Thematic Order

Your First 625 (in Thematic Order, with notes):

Key:

Category words (i.e. 'animal') are designated with a little superscript C (Like this^c). Learn these words word by word by using 2-3 other pictures/words on your flashcards (i.e. 'animal = dog, cat, fish...'). Check out the "Special Scenarios" section of the 2nd Gallery in the book to see an example, or watch the second half of the Kickstarter webinar recordings.

Easily Confounded Images (i.e., 'girl' looks like 'daughter') are designated with an asterisk (Like this^{*}). These are groups of words that will use very similar images (girl/daughter, marriage/wedding). Learn these words by adding a personal touch (i.e., the name of a 'daughter' you might know) or an additional word or two in your target language (i.e., *daughter* might go with *mother/father*). Again, see the "Special Scenarios" section of the 2nd Gallery for examples, or watch the Kickstarter webinar.

Animal: dog, cat, fish, bird, cow, pig, mouse, horse, wing, animal^c

Transportation: train, plane, car, truck, bicycle, bus, boat, ship, tire, gasoline, engine, (train) ticket, transportation^c

Location: city, house, apartment, street/road, airport, train station, bridge, hotel, restaurant, farm, court, school, office, room, town, university, club, bar, park, camp, store/shop, theater, library, hospital, church, market, country (USA, France, etc.), building, ground, space (outer space), bank, location^c

Clothing: hat, dress, suit, skirt, shirt, T-shirt, pants, shoes, pocket, coat, stain, clothing^c

Color: red, green, blue (light/dark), yellow, brown, pink, orange, black, white, gray, color^c

Note: Use these last three (*noun*, *verb*, *adjective*) as labels to help distinguish between very similar-looking words (i.e., *to die (verb)*, *death (noun)*, *dead (adjective)*)

Directions: top, bottom, side, front, back, outside, inside, up, down, left, right, straight, north, south, east, west, direction^c

Note: You may not find all of these in your glossary, and you may have trouble finding pictures even if you do. That's fine. Skip them for now, or use my collection of images for directions and prepositions at Fluent-Forever.com/Appendix5

Seasons: Summer, Spring, Winter, Fall, season^c

Numbers: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 30, 31, 32, 40, 41, 42, 50, 51, 52, 60, 61, 62, 70, 71, 72, 80, 81, 82, 90, 91, 92, 100, 101, 102, 110, 111, 1000, 1001, 10000, 100000, million, billion, 1st, 2nd, 3rd, 4th, 5th, number^c

Note: If you search for a number (*uno (one), dos (two), tres (three)*), you'll find pictures of objects (1 apple, 2 monkeys, etc.). This usually works until 10. Then search for the digits (10, 11, 12). You'll find colorful numerals, address signs, etc. Use these images (picture of hotel room #33) instead of text (#33); these pictures easier to remember and they don't get mixed up as easily.

Months: January, February, March, April, May, June, July, August, September, October, November, December

Note: You'll usually find pictures of holidays and weather. Add in the number of each month (#1-12) to get more specific.

Days of the week: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday

Note: You'll usually find pictures of people going to work on Mondays and partying on Fridays/Saturdays, etc. To get more specific, use an image of a weekly calendar with weekends greyed out and indicate which day you want. I have an English-free one at Fluent-Forever.com/Appendix5.

Time: year, month, week, day, hour, minute, second, morning, afternoon, evening, night, time^c

Note: You'll find pictures of clocks and calendars. If needed, define each time division in terms of another time division, i.e. $60 \times \textit{minuto} = 1 \text{ ____ } (\textit{ora})$, $1 \textit{ ora} = 60 \times \text{ ____ } (\textit{minuto})$. Don't worry about plural forms (you don't need the word for "minutes" yet)

Verbs: work, play, walk, run, drive, fly, swim, go^c, stop, follow, think, speak/say, eat, drink, kill, die, smile, laugh, cry, buy*, pay*, sell*, shoot(a gun), learn, jump, smell, hear* (a sound), listen* (music), taste, touch, see (a bird), watch (TV), kiss, burn, melt, dig, explode, sit, stand, love, pass

by, cut, fight, lie down, dance, sleep, wake up, sing, count, marry, pray, win, lose, mix/stir, bend, wash, cook, open, close, write, call, turn, build, teach, grow, draw, feed, catch, throw, clean, find, fall, push, pull, carry, break, wear, hang, shake, sign, beat, lift

Note: For verbs, you'll probably need to learn your language's word for "verb" and add it to any verb that could masquerade as a noun (*to kiss* vs *a kiss*). I give you guidelines for this in the "Special Scenarios" section of the book's Gallery, or in the discussion of flashcards at the end of the Kickstarter webinar recording.

Adjectives: long, short (vs long), tall, short (vs tall), wide, narrow, big/large, small/little, slow, fast, hot, cold, warm, cool, new, old (new), young, old (young), good, bad, wet, dry, sick, healthy, loud, quiet, happy, sad, beautiful, ugly, deaf, blind, nice, mean, rich, poor, thick, thin, expensive, cheap, flat, curved, male, female, tight, loose, high, low, soft, hard, deep, shallow, clean, dirty, strong, weak, dead, alive, heavy, light (heavy), dark, light (dark), nuclear, famous

Note: For a few of these adjectives, you may need to learn your language's word for "adjective" and add it in cases of ambiguity (i.e., *to clean* vs *a clean* room).

Pronouns: I, you (singular), he, she, it, we, you (plural, as in "y'all"), they.

Note: Make sure you read about these in your grammar book before adding them. Languages divide their pronouns into many categories. Hungarian, for instance, has *six* words for "you" (singular informal, singular formal (for acquaintances), singular official (for teachers, policemen, bureaucrats), plural informal, etc.), and depending upon how you count, Japanese either has *no* pronouns or *tons* of pronouns. We'll need to have some pronouns *now* in order to deal with grammar *later*, so you'll want to find at least a few words to refer to yourself or someone else. You'll find a good explanation of pronouns (and a list of them) in the beginning of your grammar book. Note that you don't yet need *him*, *her*, *his*, *their*, *etc.* We'll get them later, when we discuss grammar.

How do you learn these without translations? Use pictures of people pointing at themselves/each other. I have a collection of these at Fluent-Forever.com/Appendix5 if your Google Image searches don't turn up anything good. Use these images, and if your language, like Hungarian, has different sorts of pronouns for different sorts of relationships (i.e., friends vs acquaintances), then take a few minutes to think of some people you'd use these pronouns with. Use their names on your flashcards.

French Word	Part of Speech (and gender)	Pronunciation in IPA	English Translation	Notes
habillement	m. noun	abijmã	clothing	1
magasin	m. noun	ma.ga.zẽ	store/shop	2
panneau	m. noun	pa.no	sign	3
vendre	verb	vãdʁ	to sell	
long	adjective	lɔ̃	long	
ample	adjective	ãpl	loose	4
pantalon	m. noun	pã.ta.lɔ̃	pants	
poche	f. noun	pɔʃ	pocket	
prix	m. noun	pʁi	price	
quatre-vingts	card. number	ka.trə.vẽ	80	

1 [habillement] – The generic term is “habillement”/abijmã/, which describes everything that can be worn. “Un habit” is a very common word that is synonymous with “un vêtement.” Another very common term is “prêt-à-porter,” which literally means “ready to wear” and is often used for items found in stores and fashion magazines.

2 [magasin] – “Une boutique” [butik] is also a very common word for a shop as is “un commerce.”

3 [panneau] – “Un signe” is used for hints and hand gestures. Other possible options are “signalisation” and “un panneau (pl. des panneaux) de signalisation” for signs on the road or billboards.

4 [ample] – “Loose” can generally be translated as “ample” when talking about clothing. “Les femmes enceintes portent souvent des robes amples.” = “Pregnant women often wear loose dresses.” If, instead, you’d like to talk about a loose screw or a loose wheel, use “desserré.”

soixante-dix – million – année – ancien dur – pierre – montagne – tomber – mort

©2014 Katie Tiedrich

French Word	Part of Speech (and gender)	Pronunciation in IPA	English Translation	Notes
soixante-dix	card number	swa.sât dis	70	
million	card number	mi.ljɔ̃	million	
année	f. noun	a.ne	year	1
ancien	adjective	ã.sjẽ	old (new)	2
dur	adjective	dyʁ	hard	
pierre	f. noun	pjɛʁ	stone	
montagne	f. noun	mɔ̃.taɲ	mountain	
tomber	verb	tɔ̃.be	to fall	
mort	adjective	mɔʁ	dead	3

1 [Année] – You can also use ‘an’, depending on the context. This is explained on this website: http://www.french-linguistics.co.uk/grammar/when_to_use_an_annee.shtml

2 [ancien] – “Ancien” is also a translation for the word “former” when talking about something like the former president.

3 [mort] – “Décédé” = “deceased.” “Mort” can also be used as a feminine noun, which you can see on p.46

Familie – sitzen – hinunter – Glas Boden – Boot – Kamera – Foto – Meer

©2014 Sandra Salisbury

German Word	Part of Speech (and gender/plural form)	Pronunciation in IPA	English Translation	Notes
Familie	f. noun (pl. Familien)	fa'mi.ljə	family	
sitzen	verb	'zɪtsn	to sit	
hinunter	adverb	hɪn'ʊntə	down	1
Glas	n. noun (pl. Gläser)	gla:s	glass	
Boden	m. noun	bo:dn	bottom	2
Boot	n. noun (pl. Boote)	bo:t	boat	
Kamera	f. noun (pl. Kameras)	'kaməʁə	camera	
Foto	n. noun (pl. Fotos)	fo:to	photograph	3
Meer	n. noun (pl. Meere)	me:ɐ̯	sea	

1 [hinunter] – Also “nach unten,” as opposite to “up,” which is “hinauf” or “nach oben.”

2 [Boden] – or “Grund.”

3 [foto] – You could also use “Bild.”

du – lernen – zehn – Finger – Computer – Programm – Technologie

©2014 Sandra Salisbury

German Word	Part of Speech (and gender/plural form)	Pronunciation in IPA	English Translation	Notes
du	pronoun	duː	you (singular)	1
lernen	verb	ˈlɛʁnən	to learn	
zehn	card. number	tseːn	10	
Finger	m. noun	ˈfɪŋɐ	finger	
Computer	m. noun	kəmˈpjʊːtɐ	computer	
Programm	n. noun (pl. Programme)	proˌɡram	program (computer)	2
Technologie	f. noun (pl. Technologien)	ˌtɛçnoloˈɡiː	technology	

1 [du] – German has both informal (“du”) and formal (“Sie”) words for “you.” The use of the informal form is considered very intimate in German, and traditionally there is even a special ceremony by which two people become “Du-brothers”—people who are allowed to use “du” with one another.

2 [Programm] – Also “Computerprogramm.”

買う・贈り物・自転車
それ・お金

©2014 Sandra Salsbury

Japanese Word	Part of Speech (/Counter)	Hiragana	Pronunciation in IPA	English Word	Reference Link	Notes
買う	u-verb	かう	kaɯ	to buy	Jisho	
贈り物	noun (つ「つ」)	おくりもの	okuɾimono	gift	Jisho	
自転車	noun (つ「つ」)	じてんしゃ	dʒitẽ̞˥nɕa	bicycle	Jisho	
それ	demonstrative	それ	sore	it	Jisho	1
お金	noun	おかね	okaɰne	money	Jisho	

1 [それ] – Strictly speaking, Japanese does not have a pronoun system. Nouns, titles, proper names, and occasionally adjectives are generally used as pronoun substitutes. The gender of the speaker and the person spoken to, the degree of formality required, and the regional dialect are all factors that influence which word should be used in a given situation. The meaning of "sore," given here as an approximate translation for "it," is something like "that thing."

服・店・サイン・売る・長い・緩い・ズボン
 ・ポケット・値段・八十

©2014 Sandra Salsbury

Japanese Word	Part of Speech (/Counter)	Hiragana	Pronunciation in IPA	English Word	Reference Link	Notes
服	noun	ふく	ɸʊkɯ	clothing	Jisho	
店	noun (つ「つ」)	みせ	miise	store/ shop	Jisho	1
サイン	noun (つ「つ」)	さいん	sa ⁺ ĩn	sign	Jisho	2
売る	u-verb	うる	uɾɯ	to sell	Jisho	
長い	i-adjective	ながい	naga ⁺ i	long	Jisho	
緩い	i-adjective	ゆるい	jɯɾɯ ⁺ i	loose	Jisho	
ズボン	noun (つ「つ」)	ずぼん	zɯbõ ⁺ n	pants	Jisho	3
ポケット	noun (つ「つ」)	ぽけっと	poke ⁺ tto	pocket	Jisho	4
値段	noun	ねだん	nedan	price	Jisho	
八十	number	はちじゅう	jaɽɕiɰdzɯː	80	Jisho	

1 [店] – You could also use the more formal counter "ken" ("軒"). Mise is a general term for shop or shop worker. If you know what kind of shop it is, then you add 屋 ya to the end of the word. For example, a book shop is 本屋. 店 can also be used for a restaurant, so it's slightly wider than the English "shop, store".

2 [サイン] – This can also mean a signature or autograph.

3 [ズボン] – "Hon" changes into "bon" or "pon," depending on the number of pants referred to.

4 [ポケット] – You could also use the counter "ko" ("個").

глухой – родитель – громкий – телефон ребенок – плакать – слеза

©2014 Sandra Salsbury

Russian Word	Part of Speech (and gender)	Romanization	Pronunciation in IPA	English Translation	Notes
глухой	adj.	gluxoj	glu'xoj	deaf	
родитель	m. noun	roditel'	re'dʲitʲɪlʲ	parent (= mother/father)	1
громкий	adj.	gromkij	'gromkʲɪj	loud	
телефон	m. noun	telefon	tʲɪlʲɪ'fon	telephone	
ребенок	m. noun	rebenok	rʲɪ'bʲonək	baby	
плакать	verb	plakat'	'plakətʲ	to cry	
слеза	f. noun	sleza	slʲɪ'za	tear (drop)	

1 The male and female forms of parent are “родитель” and “родительница.” However, the singular “parent” is rarely used in Russian. The word for the plural “parents,” “родители” (Romanization: “roditeli”) is far more common.

светлый – голубой – рубашка – полиция пистолет – стрелять – убийство

©2014 Sandra Salsbury

Russian Word	Part of Speech (and gender)	Romanization	Pronunciation in IPA	English Translation	Notes
светлый	adj.	svetlyj	'sv'etlɨj	light (vs dark)	
голубой	adj.	goluboj	gəlu'boj	blue	1
рубашка	f. noun	rušaška	ru'baʂkə	shirt	
полиция	f. noun	policija	pə'lʲitsɨjə	police	2
пистолет	m. noun	pistolét	pʲɪstɐ'lʲet	gun	3
стрелять	verb	streljat'	strʲɪ'lʲatʲ	to shoot	
убийство	n. noun	ubijstvo	u'bʲijstvə	murder	

1 The word “голубой” means “light blue.” “Dark blue” is “синий” (Romanization: “sinij”).

2 Until very recently, the word for “police” was “милиция” (Romanization: “milicija”).

3 Another word for a gun, particularly a rifle is “ружье”.
